

# Clay Succulent Pot

## supplies

- Model magic clay-I am using white, and will paint but you can choose pumpkin colors if you do not want to paint it.
- Acrylic paint

## tools

- Paintbrush
- Paper Plate
- Parchment paper
- Tool for the lines on the pumpkin, could be a skewer, paint brush handle etc.
- Cup of water
- Paper towel

## instructions

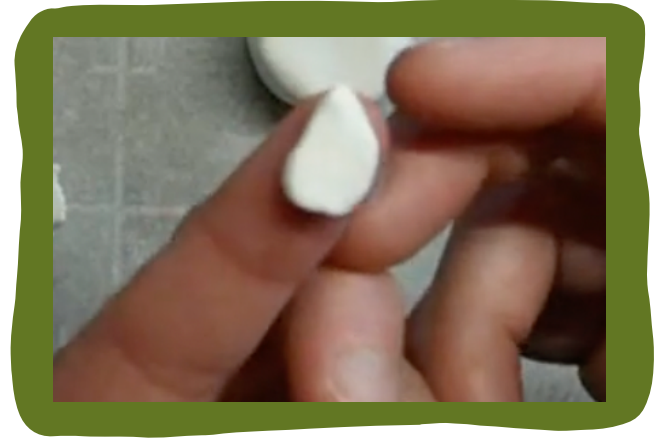

- 1** Place your parchment paper on your working surface. Model magic clay will stick to itself, so be aware of this when you are ready to attach the pieces.
- 2** Get a piece of clay to create your pot, this can be what ever size you want, I used the size of a large marshmallow for mine. Roll your pot into a short cylinder shape.

# Clay Succulent Pot

3

Take small pieces of clay, about the size of a pencil eraser and create tear drop shapes for the leaves of the plant.

4

Add your leaves around the top of the pot, when you have one layer, add the next round of leaves staggered and placed between the ones before. Repeat until you reach the top and create one last leaf and add it to the middle.

5

Let your succulent pot dry completely, it usually takes 24 hours.

# Clay Succulent Pot

- 6 Paint the leaves, and if you have time let it dry so it is easier to paint the bottom. For the bottom I mixed white with black to create a grey color. Let it dry completely.
