

How to make a volcano with clay

supplies

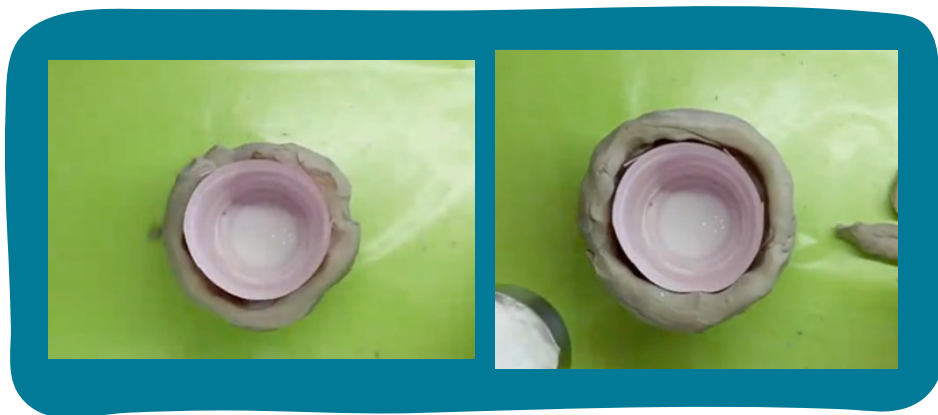

- Air dry clay
- Baking soda 1/2 cup
- Vinegar 1/2-1 cup
- 1 tsp. dish soap
- Food coloring (optional)
- Volcano decorations (optional)

tools

- Tray or paper plate
- Wax paper
- Paper cup
- Measuring cup

instructions

- 1 Set up your tray with wax paper or your paper plate.
- 2 Cut your plastic cup so that it is about 3" tall or so, and place that in the middle of your tray. Start to create coils/snakes of clay and place them around the cup.

How to make a volcano with clay

3

Add your baking soda to the cup.

4

Start adding clay around the bottom for the base and on the outside edges, creating your volcano shape.

5

Once your base is finished, add a few coils to the top of the volcano to hide the cup inside, you can make each coil a little bit smaller so that the opening gets smaller on the top.

How to make a volcano with clay

- 6 You can add other decorations to your tray and volcano at this point. You will need to let your volcano dry completely, at least 24 hours.

- 7 Mix your vinegar, dish soap, and optional food coloring. Slowly start to pour inside your volcano to see the magic start to happen!
