

DIY Paper towels

supplies

- Flannel fabric- 6 1/2" x 11 1/2" (you can adjust the size)
- Terry cloth fabric or an old towel- 6 1/2" x 11 1/2" (you can adjust the size)
- Coordinating thread
- Plastic snaps (optional)

tools

- Sewing Machine
- Pins
- Iron
- Ironing board/mat
- Self-healing mat
- Rotary cutter or fabric scissors
- Acrylic ruler 6"x24"
- Plastic snap pliers (optional)

instructions

1

Cut your flannel fabric and terry cloth fabric to 6 1/2" x 11 1/2" or the desired size, stack them right sides together, and pin them in place.

DIY Paper towels

- 2 Sew using a 1/4" seam allowance, leaving an opening of 2-3" to turn out later. Backstitch at the beginning and end.

- 3 Clip your corners to reduce bulk, make sure not to cut stitch lines.

- 4 Turn your paper towel right side out, pushing out the corners.

DIY Paper towels

- 5 Press your paper towel, and make sure to fold in the raw edges of the opening.

- 6 Topstitch all the way around using a 1/4" seam allowance. Make sure to close the opening. Backstitch at the beginning and end.

- 7 To attach the optional snaps: Start by orienting your towels the way you want to store them. I chose to attach them to the shorter sides, but you can do it either way.

DIY Paper towels

- 8 Follow your package instructions for your snaps, they are all a little different. Start by poking a hole where you want to place the snaps.

- 9 Using the plastic snap pliers, attach the snaps to your towel. Mine had (3) different parts, check with your package to make sure you put them on the correct side.

DIY Paper towels

10 Congratulations!

you are ready to
use your paper
towels!
