

# Stacked Pumpkins Tote Bag

## supplies

- Canvas tote bag
- Felt sheets 9" x 12" -I used cream, green, navy, and brown)
- Embroidery floss that coordinates with the template you are using.
- Aleenes tacky glue

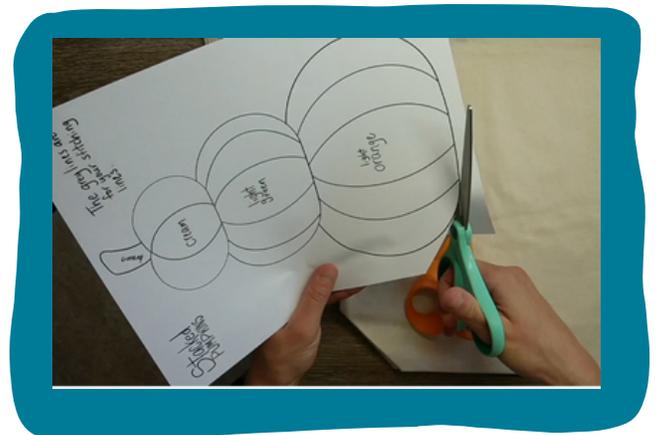

## tools

- Fabric scissors
- Chenille needle (big eye, sharp tip)
- Printed templates
- Scrap paper to put inside your back when the glue is drying.

## instructions

**1** Place your scrap paper inside your tote bag to prevent the two sides from sticking.

**2** Cut out all (4) pieces of your template (three pumpkins, one stem).

# Stacked Pumpkins Tote Bag

- 3 Trace them onto the felt pieces.

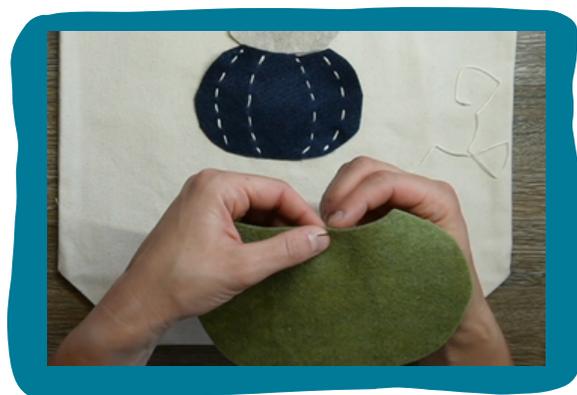

- 4 Cut all felt pieces out.

- 5 If you want to, you can trace the curved pumpkin lines with a marking tool and use the template as a reference. This will give you a line to follow when stitching.

# Stacked Pumpkins Tote Bag

**6** Thread your needle with the embroidery floss you want to use for accents. I used all six strands. Tie a knot at the end and start in the back of your felt to hide the knot.

**7** Stitch the curved lines on each pumpkin using the running stitch. When you need a new thread, make sure to make a loop in the back and tie a knot to secure it.

**8** Once all pumpkin pieces have their accents you can glue them to your tote bag. I find that you need quite a bit of glue to secure the pieces. Add the glue to the back of your felt pieces and place it on your bag.

# Stacked Pumpkins Tote Bag

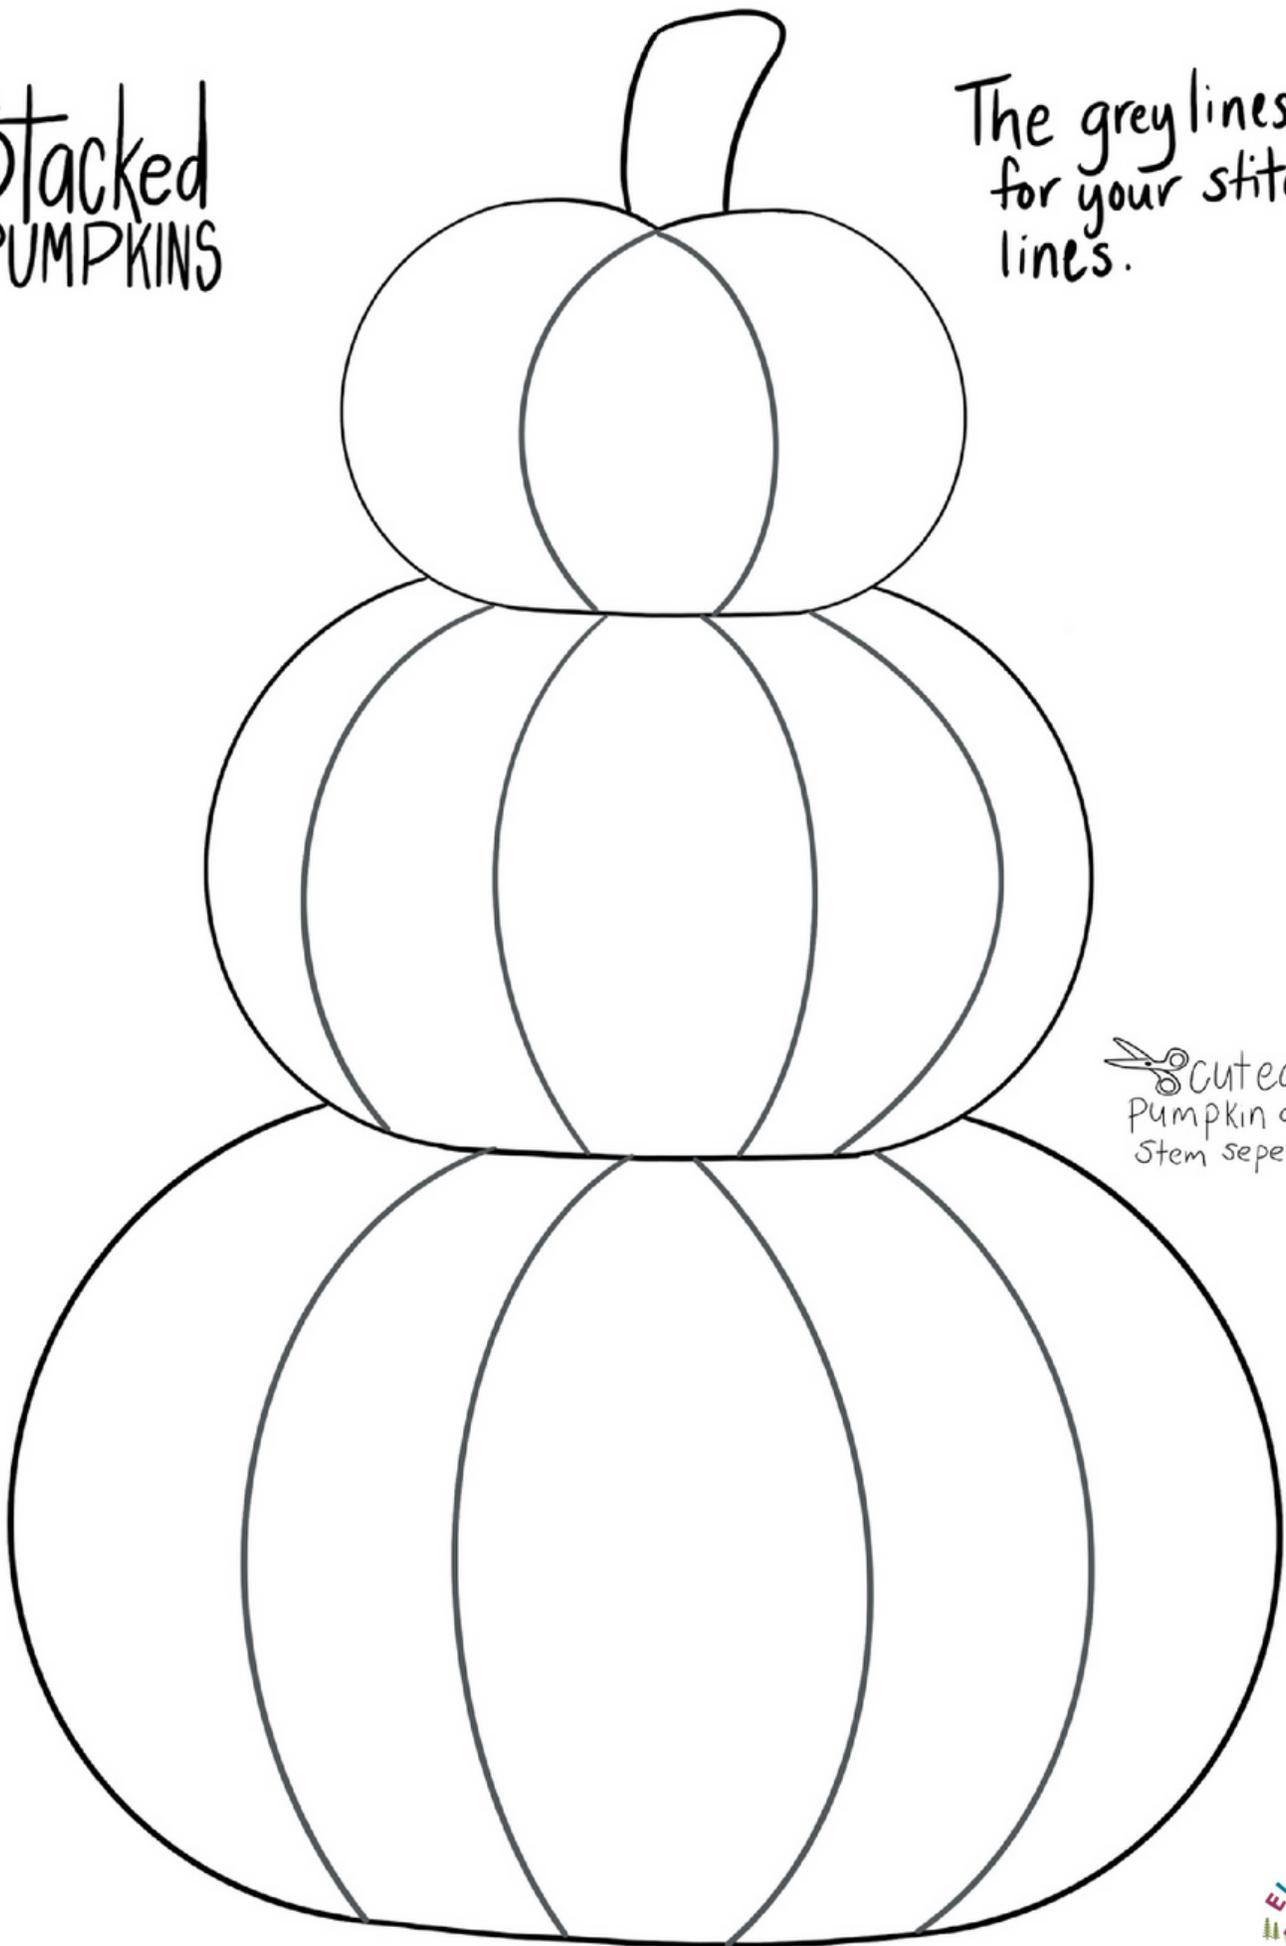

- 9 Let the glue dry completely and you have a new fall tote bag!
